

GOAS Scissortail

Greater Ozarks Audubon Society Newsletter :: November 2011 :: Volume 34 Issue 8

TWEETS

By David Catlin, GOAS Chapter President

November and December may well be my two favorite months involving birds.

November's star, of course, is the Thanksgiving turkey, which I like partly because it tastes so good and partly because Madison Avenue hasn't figured out a way to start selling it months ahead of time.

The attraction in December is the annual Christmas Bird Count (CBC). There are so many reasons to look forward to this event! Here are just the most compelling;

- For those of us with the energy, stamina, and tolerant spouses, *it's an all-day field trip*. I can make my plan in advance: nothing else gets done today.
- *Every bird matters!* Because the CBC involves an effort to count every individual bird we see, every House Sparrow and Carolina Chickadee makes a difference, and is a cause for at least some rejoicing.
- *Everybody can contribute.* First, most of the birds we see and tally are the common birds most everyone can identify: Canada Geese, American Robins, Northern Cardinals, Dark-eyed Juncos, and other familiar species. Second, the "eyes have it." The more observers we can pack in a car or on the trail, even if all they do is shout and point when they see a bird—the better we do. As long as

one birdwatcher in the group knows their stuff, success is assured.

- *It's a little bit competitive.* Most of us downplay this, but secretly we all hope to find the one bird no one else has seen that day—a Common Yellowthroat lingering on its way south, or maybe a Peregrine Falcon! Because CBC participants gather at the end of the day to report and count their birds, there is always an audience for our personal triumphs. When David Blevins, the Springfield CBC recorder, asks at the end of our tally, "Did anyone see anything not on the list," it's great to be able to say, "Yes!"
- *The results are meaningful.* The Christmas Bird Count is conducted year after year in the same count circles during the same time period. Because data are gathered in over 2,000 locations across the continent, biologists and ecologists can use the information to draw important conclusions about what is happening to birds over time.
- *It ends with a potluck.* As I mentioned above, at the end of the day all the event's participants gather together to report the counts from their respective parts of the circle, and to share a meal. It's Thanksgiving all over again!

I hope you will plan to join us this year, even if you've never participated in a Christmas Bird Count before. Either come to the brief planning meeting at 7:00 p.m. Tuesday December 6 at the nature center, or give me a call at 889-9940. We'll see that you get connected with a team!

TUESDAY DECEMBER 13th

**SPRINGFIELD & TANEY CO. CHRISTMAS
BIRD COUNT PLANNING MEETING**

7:00 pm Springfield Nature Center

*Reminder: No membership meet-
ing or newsletter in December!*

THIS MONTH'S PROGRAM...

The November program will feature the 2011 Green Leadership Academy graduates, who will talk about their week at camp and their upcoming community projects. Please join us to support these exceptional young conservation leaders.

The Green Leadership Academy for Diverse Ecosystems (GLADE) is a project of GOAS and Missouri State University (MSU), where sixteen junior and senior students gain the skills to become the next generation of community leaders by spending a week each summer at MSU's Bull Shoals Field Station working hard and getting dirty. At the conclusion, each teen may apply for a

\$250 grant to develop a project in their school or community. If the student works with a Mentor Team, they may leverage their grant to \$500, or can work together to pool grant funds.

Come at 6:30 pm, Thursday, November 17th for refreshments and to socialize. The program will begin at 7:00 pm, followed by the membership meeting at the Springfield Conservation Nature Center, 4601 Nature Center Way (off Business Highway 65).

Deluxe Bluebird Nest Box	Includes Predator Guard and Mounting Hardware		10.00		
Note: Donations fund educational programs including Audubon Adventures and the Green Leadership Academy, and conservation projects including South Creek, the Important Bird Area program, and bird inventories. The seed prices are higher this year because the extended summer heat impacted yield. If you find less expensive seed at large retailers, it is probably 2010's crop. We only sell this season's crop to ensure the highest quality bird seed on the market. Thank you for your order supporting our chapter.			Total Bird Seed \$		
			Optional Donation (see note) \$
